AVVISO DI SEMINARIO

Mercoledì 18 Gennaio 2012, alle ore 12:00, presso la biblioteca dell’Istituto per il Rilevamento Elettromagnetico dell’Ambiente (sede di Napoli), si terrà il seminario:

Optimal current distributions on antennas

Prof. Mats Gustafsson
Lund University, Sweden

Mats Gustafsson received the M.Sc. degree in Engineering Physics in 1994, the Ph.D. degree in Electromagnetic Theory in 2000, was appointed Docent in 2005, and Professor of Electromagnetic Theory 2011, all from Lund University, Sweden. He co-founded the company Phase holographic imaging AB in 2004. His research interests are in scattering and antenna theory and inverse scattering and imaging with applications in microwave tomography and digital holography. He has written over 55 peer reviewed journal papers and over 70 conference papers. He received the best antenna poster prize at EuCAP 2007 and the IEEE Schelkunoff Transactions Prize Paper Award 2010.
